Weather Web application

React.js

20nd September 2023

I crafted a user-friendly weather web app using React.js and Material UI. It lets you quickly check the weather for any location.

Ecommerce website

Next.js

11th November 2023

Developed a dynamic Next.js website with user authentication, authorization, and login/signup functionality. Implemented user and admin pages with a user-friendly interface, enabling admins to add products for users to explore, with a streamlined "add to cart" feature enhancing the overall user experience.
